DETAILED ACTION

I. Preliminary Matters:

(a) Applicants response filed 8/6/2003 has been received and entered into the file.

-Claims 1-18 have been cancelled.

-Claims 24-28 have been newly added.

-claims 19-28 are instantly pending.

II. Remarks:

(a) Issues regarding 35 USC 102(b): The rejections cited against claims 19-23 have been overcome due to the amendments made to said claims. However, the amendments have resulted in a new ground of rejection which is outlined below.

III. New Rejections:

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(a) Claims 24-28 are rejected under 35 U.S.C. 102(b) as being anticipated by Macor, et al (US 5,545,644).

Applicants claims relate to eletriptan and its acid addition salt (hydrobromide) 'substantially free' (this reads on an amount >0) of a dimer of eletriptan precursor (the process of making this compound does not lend patentable weight to the claim as the claim is drawn to a product claim). Macor, et al teach eletriptan and its acid addition salt (hydrobromide). See col.

2, lines 55-68. The reference also teaches a process of making the same. See col. 49, examples 32-34. The chemical compounds recited in the reference are prepared from the same precursor that is prone to forming the dimer and hence would result in the product that has an amount (>0) of dimer in the end product as is instantly claimed. Hence, the reference anticipates the instant claims.

(b) Claims 19-23 are rejected under 35 U.S.C. 102(b) as being anticipated by Willems, et al (cited by Applicants) OR Harding, et al (US 6,110,940) cited by Examiner.

Applicants claims relate to eletriptan or its commercially available hydrobromide salt that is 'free' of a dimer of eletriptan precursor, which reads on eletriptan or its hydrobromide salt by itself. Willems, et al teach eletriptan and Harding, et al teach its acid addition salt (hydrobromide). See page 213, figure 1, depiction of Eletriptan (Willems reference) and abstract (Harding reference). Hence, these references anticipate the instant claims.

IV. Finality:

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 1626

however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
